

I have served on the Crescent Sonterra Board for several years. I began working with a community greenbelt committee that helped preserve this area as a part of Crescent Sonterra. We have been able to add landscaping and maintenance services to the greenbelt without increasing dues or passing special assessments. Even major projects such as the Cabana Extension have been done without special assessments. Careful management of our budget with minimal dues increases and assessments has been an important goal of your current board members. This past year the pandemic presented an unusual problem operating a pool. Thankfully, we were able to open the pool and still meet the State and local guidelines for a safe environment. This took a great deal of planning and sacrifice from both board, life guards, and community members. I established a web based application tied to our website that helped enable us to meet occupancy and monitoring requirements while still allowing members access on a scheduled basis. Thanks to all members and the life guards who helped make this work. While it appears the severe restrictions will be lifted, there is still a lot of work to do to improve the pool, playgrounds and greenbelt. I hope to continue working on these projects should you re-elect me for an added term.
